2015

HOW IS **AFFORDABLE** THREATENED

IN YOUR **NEIGHBORHOOD?** 

- Area that ranked in the Top 10 for the particular indicator.
- Area that ranked in the Top 20 for the particular indicator. Area that ranked in the Top 25 for overall Threats to Affordable Housing Present
- No shading does not mean the threat is absent for a particular area, but rather that it is out of the Top 20.
- Threats to Affordable Housing (far right column) reflects the total number of weighted threats to a given neighborhood's affordable housing.

This is just a small sample of possible indicators of threats to neighborhood affordable housing and is not meant to rank which neighborhoods are most at risk of losing affordable housing. Neighborhood scores should not be used in comparison to previous years' scores because the indicators included in each year's chart vary slightly. Data was compiled using the U.S Census Bureau's 2011 Housing Vacancy Survey and the 2013 American Community Survey 1-Year Estimates, NYCOpenData, NYC Depart of Finance Data, the NYU Furman Center's "Data Research Tool," the University Neighborhood Houing Program's (UNHP) Building Indicator Project (BIP) database, the FFIEC Home Mortgage Disclosure Act data, and data from The Institute for Children, Poverty, and Homelessness (ICPH). Most data is for Community Districts, but some data is for Sub-Borough Areas or Public Use Microdata Areas (PUMA) both of which are defined by the U.S. Census Bureau and so we are able to use the two interchangeably. Sub-borough Areas are geographic units created by the Census Bureau for the administration of the New York City Housing and Vacancy Survey. Public Use Microdata Areas are designed for decennial census Public Use Microdata Sample (PUMS) data, American Community Survey (ACS) PUMS data and ACS period estimates. They approximate New York's Community Districts. However, because they are constructed from census tracts, their boundaries do not coincide precisely with Community District boundaries. There are 59 Community Districts in New York but only 55 Sub-Borough Areas/ PUMAs because the areas of four pairs of community districts were combined by the Census Bureau in creating the Sub-Borough Areas/PUMAs to improve sampling and protect the confidentiality of respondents. These pairs are Mott Haven/Melrose (CD 101) and Hunts Point/Longwood (CD 102) in the Bronx, Morrisania/Crotona (CD 103) and Belmont/East Tremont (CD 106) in the Bronx, the Financial District (CD 301) and Greenwich Village/Soho (CD 302) in Manhattan, and Clinton/Chelsea (CD 304) and Midtown (CD 305) in Manhattan.
